All papers should be in Croatian, Serbian or English language. In case the article is submitted in another language it can be considered for review process if the editors find an appropriate reviewer.

First page of the paper should contain: title, abstract, at least three keywords, at least three JEL classification codes (http://www.aeaweb.org/journal/jel_class_system.html) names of authors and professional affiliations of the authors.

Also a corresponding author should be clearly noted.

Papers should be written in Microsoft Word .docx or .doc format, in Times New Roman, font size 12, line spacing 1.5. The margins should be 2,5 cm.

EKONOMIJA / ECONOMICS does not place restrictions on the size of the papers, but authors should limit their papers to 35 pages of text (tables , graphs, references included) given the above formatting specifications.

For the simplicity of publication tables should be formatted as text, not as pictures. During the process of publication it is possible for the editors to request the original data in order to create graphs and tables in the final print version of the journal.

Tables and graphs should be a part of the document and not in a separate document. All tables and graphs should be put within the text. Complex model simulation can be put at the end of the paper. If graphs and figures are placed at the end of the paper, they should be placed after bibliography. When explaining a certain table and/or graph from the paper, the number of the table and/or graph must be indicated, e.g. "In table 1 we can see that". Words like "above" or "bellow" should be avoided.
